

# **Project Development Phase**

## **Definition:**

Project Development Phase is the process of planning, designing, building, testing, and delivering a project to achieve its objectives.

## **1. Planning**

Define goals, create project plan, define scope, estimate budget, set timeline, assign team, and identify risks. Output: Project Plan Document.

## **2. Design**

Design how the project will look and work. Output: Design specifications.

## **3. Development / Execution**

Build the product, coding, construction, and perform tasks. Output: Working product.

## **4. Testing**

Find and fix bugs, quality check. Output: Tested product.

## **5. Implementation / Deployment**

Launch or deliver the project.

## **6. Monitoring and Control**

Track progress, budget, time, and quality.

## **7. Closure**

Completion report, client approval, and documentation.
